PDC-0002-WA14

Overview of FY2014 Project Requirements

Construction of the US Coast Guard Headquarters is scheduled to be completed in FY2013 and GSA proposes to continue development of the St. Elizabeths Campus with renovation and adaptive reuse of the Center Building, one of approximately 61 historic buildings currently located on the St. Elizabeths Campus. When completed, the Center Building will house the DHS Secretary and other senior leadership of DHS. In addition to these renovations, Hitchcock Hall will also be renovated as originally planned in Phase 1b so DHS will have access to appropriate meeting space. Additional infrastructure work including perimeter security will be completed in order to finish the necessary site improvements included previously in Phase 1b.

Fiscal Year 2014 Requirements

FY2014 Appropriation Requested	\$261,531,000
FY2014 Committee Approval Requested	\$498,573,000 ¹
Total FY2014 Requirements	\$261,531,000
Estimated Construction Cost (Phase 1b Infrastructure & Phase 2a)	
Management and Inspection (Phase 1b Infrastructure & Phase 2a)	11,700,000
Design (Phase 2a)	17,837,000
Historic Preservation	1,000,000

Overview of Project

GSA seeks appropriations for the development of the DHS consolidated headquarters at St. Elizabeths Campus. The West Campus is a 176–acre National Historic Landmark that included 70 existing buildings containing approximately 1.2 million gsf of existing space. Several existing buildings have been demolished to make way for the USCG headquarters; as of September 30, 2012 there were 61 buildings remaining that contain approximately 1 million gsf. The portion of the DHS program to be housed on the East Campus requires the development of between 8 and 10 acres of land with supporting infrastructure and access to ensure the DHS Headquarters facility's operation is one secure campus.

The site will be developed in accordance with guidelines set out in the Master Plan as amended and/or as a result of continued compliance with NHPA and NEPA during specific project

¹ This represents the balance of committee approval needed for the project less remaining Infrastructure appropriations needed. The Infrastructure Program is not subject to the requirements of 40 U.S.C. Section 3307.

PDC-0002-WA14

designs.² Accordingly, CFA approved the design of the USCG headquarters on November 19, 2009 and NCPC approved it on January 7, 2010.

Committee approval and appropriations for Phase 1 of the project — construction of a new headquarters facility for the USCG — have already been obtained. Development Phase 2-a includes construction of office space to consolidate DHS headquarters and the DHS Operations Center (DOC), house leadership presences of various DHS components such as Secret Service, and provide amenity space. Phase 2-b proposes the construction of a new headquarters facility for FEMA plus amenity space and road improvements on site. Parking will also be included with both sub phases. Phase 3 will accommodate the remaining elements of DHS headquarters units. The project will include the rehabilitation of existing space as well as construction of new space. This prospectus seeks approval for appropriations for the rehabilitation of the Center Building plus related structures and infrastructure as well as historic preservation measures to house the DHS Secretary and other DHS leadership elements on the West Campus.

Project Phasing

Phase 1-a	USCG – HQ (completed)	Coast Guard Headquarters
Phase 1-b	USCG – CC (completed)	Coast Guard Command Center/shared use space/GSA Field Office
Phase 2-a	DHS (ongoing)	Office of the Secretary and Senior Leadership
Phase 2-a	DOC (to be completed)	DHS Operations Center
Phase 2-a	Other (to be completed)	Leadership presence of components not fully moving to St. Elizabeths
Phase 2-b	FEMA HQ (to be completed)	Federal Emergency Management Agency (FEMA) Headquarters
Phase 3	TSA, ICE, CBP (to be completed)	Transportation Security Administration HQ - Significant presence, Immigration and Customs Enforcement HQ - significant presence, Customs and Border Protection HQ - significant presence

² The Master Plan can be found at the project's web site: http://www.stelizabethsdevelopment.com/

FY2014 Appropriation Requested......\$261,531,000

Primary Occupants

USCG, DHS Headquarters Elements, FEMA, DOC, TSA, CBP, ICE, and a Leadership Presence of Other DHS Components not relocating to the St. Elizabeths Campus

³ ETPC does not include planning and stabilization costs of \$20 million incurred prior to FY 2006.

⁴ This represents the balance of committee approval needed for the project less remaining Infrastructure appropriations needed. The Infrastructure Program is not subject to the requirements of 40 U.S.C. Section 3307.

PDC-0002-WA14

I. SITE ACQUISITION PROGRAM SUMMARY

Delineated Areas for Site Acquisition

The proposed sites to be acquired are as follows:

- 1. Approximately two acres of land located on Firth Sterling Avenue in southeast Washington, DC, where it is contiguous to the northwest corner of St. Elizabeths West Campus; the land is currently controlled by DC and CSX Corporation.
- 2. Approximately one acre of land located along the east side of Martin Luther King, Jr. Avenue in southeast Washington, DC, between the Unified Communications Center and the current tunnel between the East Campus and West Campus. The land is currently controlled by DC.
- 3. Approximately fourteen (14) acres of land located on Shepherd Parkway in southeast Washington, DC, between the St. Elizabeths West Campus and Malcolm X Avenue, parallel to Interstate 295. The land is currently controlled by NPS.

Total Site Acquisition Project Budget

Site Acquisition (Firth Sterling Avenue) (FY2009)	\$7,000,000
Site Acquisition (Martin Luther King, Jr. Avenue) (ARRA)	500,000
Site Acquisition (Shepherd Parkway) (ARRA)	3,500,000
Total Acquisition Budget	\$11,000,000

PDC-0002-WA14

II. INFRASTRUCTURE PROGRAM SUMMARY

Infrastructure repair / replacement costs include: demolition of specific buildings identified by the Master Plan; replacement of site utilities including electricity substations and local utility requirements, an addition to the existing power plant for a fully functional CUP with cogeneration capability; distribution systems for electricity, natural gas, domestic water, storm water, waste water, data systems and telecommunications; roadways, surface parking and sidewalks; refurbishment of historical ornamental landscape and creation of new landscape features as needed including flora; cleanup / repair of existing tunnels on site to improve safety and for potential use as systems distribution pathways; and site security fencing, entry gates, guard stations, and other site security features. There was \$46 million for the access road construction originally included in the Infrastructure budget in prior years that has been moved to the Highway Interchange program budget in Part III of this prospectus.

The planned alterations are necessary to preserve, maintain, and reuse this historic site. Existing infrastructure and the landscape have suffered from aging and deferred maintenance. The utility distribution systems are antiquated and deteriorated. Building repairs include repair and improvement of structural and life safety systems while maintaining historic integrity. The landscape will be maintained, protected, and preserved to the extent feasible.

III. HIGHWAY INTERCHANGE PROGRAM SUMMARY

The Highway Interchange Program that was developed as part of the Master Plan proposes an access road to the St. Elizabeths West Campus that extends between Firth Sterling Avenue to the north and Malcolm X Avenue to the south, parallel to Interstate 295. Funds for construction of the access road in the amount of \$46 million were originally included in the Infrastructure program described above, but additional transportation improvements have subsequently been identified. A new, reconfigured interchange between Malcolm X Avenue and Interstate-295 is one of these improvements. This reconfiguration will be necessary to direct St. Elizabeths traffic onto the access road that, in turn, will mitigate the impacts of additional traffic that is anticipated as the result of the redevelopment of St. Elizabeths. GSA worked closely with FHWA and the DC Department of Transportation to prepare an Interchange Justification Report (IJR) to facilitate required modifications to the Malcolm X Interchange. Other related transportation improvements that are needed as a result of the St. Elizabeths development are also included below as separate line items. Improvements that must be in place by occupancy of Phase 2 of the St. Elizabeths project are included in the Building Program budget in Part V of this prospectus. These improvements need to be funded in conjunction with Phase 2 of the project to avoid further schedule delays and cost escalations. DHS included \$89 million in its FY2013 budget request to complete the Access Road to Malcolm X Avenue.⁵

Total Highway Interchange Project Budget

IV. HISTORIC PRESERVATION MITIGATIONS PROGRAM SUMMARY

As of December 9, 2008, GSA and DHS along with NCPC entered into a Programmatic Agreement (PA) with the Advisory Council on Historic Preservation (ACHP), the District of Columbia Historic Preservation Office (DCHPO), and the United States Federal Highway Administration (FHWA). The PA outlines five (5) specific mitigation actions that must be undertaken by GSA to "resolve adverse effects from certain complex project situations". These actions are as follows:

- 1. Documentation and recordation including buildings and site, as needed, archives, historic structure reports, building preservation plans, landscape preservation treatment and management, and archaeological resources treatment and management;
- 2. Public outreach, interpretation, and education including the establishment of a citizens advisory panel, a permanent interpretative exhibit, a museum and visitors education center, signage, and public relations materials;
- 3. Public access program to be developed by GSA and DHS;
- 4. Conservation and artifact preservation; and
- 5. The 19th Century cemetery including interpretative program, perpetual care, and public access.

Major Work Items for Mitigation

Archaeology (future year request)	\$950,000

Summary of Energy Compliance

Cogeneration and Waste Heat: Approximately 30% of the campus power will be produced on site via cogeneration. This percentage represents 100% of the critical campus electrical needs in times of emergencies. The waste heat generated by the natural gas fired turbines will be converted to both steam and hot water to help heat the buildings and, through steam driven absorption chillers, to help cool the buildings.

Solar Energy: Photovoltaic energy collection arrays were considered for electric street lighting but did not meet historic preservation requirement. Large photovoltaic arrays were also found to be untenable at the site due to the limited acreage that could be used to house the solar panels. However, solar energy collecting panels or roofing membranes have been incorporated on

PDC-0002-WA14

portions of the roof tops, for example, the Detached Dining Hall being rehabilitated for use as a cafeteria.

Geothermal: Geothermal wells will be considered to support heat pump systems for new construction of the support buildings, such as the remote delivery facility and pump house. If viable, future appropriations will be requested.
